

# Cadmould Warp

More precise parts! • Higher competence! • Better sales!

Shrinkage • Warpage

**Cadmould Warp** supports injection molders, mold makers and designers.

## Functions:

- Calculation of shrinkage and warpage of the geometry after cooling to ambient temperature
- Using pressure results of the packing phase from **Cadmould Pack**
- Using the results of the calculation of fiber orientations from **Cadmould Fiber**
- Measuring of the part

## Results:

- shrinkage and warpage of the geometry at ejection time
- shrinkage and warpage of the geometry after cooling to ambient temperature
- shrinkage and warpage values for arbitrary measurements
- automatic fixing
- 3-point fixing
